

The Other Side Of The Clouds

Verse 1

The pain just won't go away, You feel empty inside, U can't find the words to pray, U have no peace of mind, Believe me I've been there too, It seems like the storm will never end, But on the other side, God's working it out for you

Chorus

On the other side of the clouds, The sun is shining, The darkness has been erased, And replaced with the light, Hope's just a prayer away, And joy will come eventually, Believe God is working now, On the other side of the clouds

Verse 2

You feel you just can't go on, And the tears won't subside, The hurt just gets worse, And your feelings you can't hide, No matter how hard it may seem, Don't give up on your dream, For God is by your side, And will take care of everything

Chorus

On the other side of the clouds, The sun is shining, The darkness has been erased, And replaced with the light, Hope's just a prayer away, And joy will come eventually, Believe God is working now, On the other side of the clouds
